EXPLORATIONS

Exploring the Submerged New World 2009

(October) Join our scientists as they explore the North American Florida Middle Grounds for traces of early human occupation on a submerged late Pleistocene landscape.

Lophelia II 2009: Deepwater Coral Expedition: Reefs, Rigs, and Wrecks

(August) Return with scientists to the Gulf of Mexico as they collect data related to cold water corals: their habitats, their levels of genetic connectivity, and the distribution of their communities.

Bermuda: Search for Deep Water Corals 2009

SPECIAL FEATURES

* FY10 Announcement of Opportunity

You can follow [Ocean Explorer on Twitter](#), a free social messaging utility for staying connected in real-time. - [Get The Widget](#)

Video Highlights

Check out highlights from expeditions, including an [underwater volcano](#), [fluorescent corals](#), the [Gulf of Alaska](#) and a [lake at the bottom of the sea](#). (QuickTime, each over 550k).

Photo Highlights

See photo slideshows from expeditions, including [an Arctic journey](#), deep-sea [aurelia](#) jellyfish, [corals from the deep](#)
